## CALCAP for Non-English Speakers:

The CALCAP program can be adapted for patients who speak a variety of different languages. The language-specific portions of the program include the task instructions that are displayed prior to the beginning of each task, and the actual stimulus materials. (The Abbreviated CALCAP program only uses the digits 0 to 9 as stimulus materials, so only the task instructions are language-specific.) *The CALCAP Manual is available only in English.*

The chart below shows versions of the CALCAP materials that are currently available. Please contact Dr. Miller at 323/761-9422 if you need stimulus materials or task instructions translated into a language not shown below.
