Qty	Description	Unit Cost	Total Cost
	CALCAP Reaction Time Program (with Drivers for Standard and Abbreviated Batteries) Delivery is by internet download (no shipping charges)	\$495	
	California Residents add 9.75% sales tax		
TOTAL 			

The CalCAP program is provided by Internet download only. Stimulus materials and subject instructions are included for administering the task in English, Spanish and Norwegian. Partial translations in other languages also are available (see reverse side of this sheet). All examiner materials are written in English.

NOTE: The CalCAP is a DOS program that works best under DOS, FreeDOS, Windows 95 and Windows 98. A Windows XP version also is available. It is not compatible with Windows Vista or later operating systems. It is incompatible with laptop computers that automatically change clock speeds to conserve energy. See the CalCAP web site (www.calcaprt.com) for more information and for work-arounds.

CALCAP for Non-English Speakers:

The CALCAP program can be adapted for patients who speak a variety of different languages. The language-specific portions of the program include the task instructions that are displayed prior to the beginning of each task, and the actual stimulus materials. (The Abbreviated CALCAP program only uses the digits 0 to 9 as stimulus materials, so only the task instructions are language-specific.) *The CALCAP Manual is available only in English.*

The chart below shows versions of the CALCAP materials that are currently available. Please contact Dr. Miller at 323/761-9422 if you need stimulus materials or task instructions translated into a language not shown below.

	Standard CALCAP		Abbreviated CALCAP
	Stimulus Materials	Task Instructions	Task Instructions
English	X	X	X
Danish	X	X	X
Flemish	X	(not available)	(not available)
French	X	(not available)	(not available)
Norwegian	X	X	X
